

International Business Division – Doing Business in China

認識中國

For Australian businesses looking for growth potential, opportunities for finding a trading partner in China are currently promising.

In the next 15 years, China could surpass Japan as the world's second largest trading nation, and between 2020 and 2030 China could emerge as the world's biggest economy.

China's ascension into the World Trade Organisation coupled with its win in securing the 2008 Olympic Games has generated much interest from the international business community. The global market is also attracted to its high gross domestic product growth, its large market for products and services, its continuously improved infrastructure and business environment and its cheap labor.

At McLean Delmo, we understand that doing business with China can be both challenging and rewarding.

We offer professional services to help Australian companies to find the right entry point into China. For those companies already operating in China we help them to manage their investments and business operations in a controllable and efficient manner.
